REEM RAMZY MOHAMMED

Senior Full Stack Engineer | Backend Development | Technical Leadership

Alexandria, Egypt | Open to Relocation | +20 155 115 7579 | reemramzym@gmail.com
LinkedIn | GitHub | Portfolio
Date of Birth: 25 September 1993 | Nationality: Egyptian | Marital Status: Single

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with hands-on experience delivering production web applications, REST APIs, mobile backends, and real-time features for logistics, fintech, e-commerce, and business systems. Experienced in Laravel/PHP, JavaScript frameworks, relational databases, performance optimization, Linux deployment, and production support. Took on team leadership responsibilities in the final months at Nahr Development, including task delegation, developer follow-up, and code reviews. Electronics and Communication Engineering graduate with certified PLC training and exposure to industrial control systems.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer | Nahr Development

2024 – May 2026 | Remote

- Developed and maintained production web applications and mobile backends using PHP 8+, Laravel, Vue.js, Nuxt.js, React.js, Next.js, and TypeScript.
- Designed REST APIs, backend services, MySQL database schemas, and third-party integrations for logistics, delivery, fintech, and internal business platforms.
- Built real-time delivery functionality for live driver tracking, driver assignment, order status updates, notifications, and in-app messaging with Laravel Reverb and WebSockets.
- Implemented payment workflows including transaction processing, wallets, refunds, pricing rules, discounts, and financial reporting.
- Improved performance and reliability through Redis caching, background queues, scheduled jobs, database indexing, and SQL query optimization.
- Integrated payment gateways, mapping services, SMS/email services, social authentication, and third-party APIs.
- Deployed and supported applications on AWS EC2 and Linux servers, working with Docker, Nginx, Apache, Supervisor, SSL, and GitHub Actions.
- Investigated and resolved production issues using application logs, debugging, and coordination with development, product, and QA teams.
- **Team leadership (final months):** Distributed development tasks, tracked developers' progress, reviewed code, and supported technical delivery while continuing hands-on development.

Freelance WordPress & PHP Developer

2019 – 2023 | Remote

- Built and customized WordPress and PHP websites for clients in tourism, travel, media, and digital content.
- Implemented responsive interfaces, theme and plugin customizations, booking and inquiry forms, and content-management functionality.
- Managed requirements, development, deployment, optimization, and post-launch maintenance.

Back-End Developer | Altatawwar Company

2018 | Alexandria, Egypt

- Developed PHP/Laravel backend features, MySQL database functionality, and external API integrations for web applications.
- Supported database design, application maintenance, troubleshooting, and deployment.

TECHNICAL SKILLS

Backend Engineering: PHP 8+ and Laravel for application logic, REST APIs, backend services, authentication and integrations; object-oriented programming (OOP), SOLID principles, and MVC architecture.

Frontend Engineering: Vue.js, Nuxt.js, React.js, Next.js, JavaScript, and TypeScript for responsive interfaces and full-stack web applications; HTML5, CSS3, Tailwind CSS, and Bootstrap.

APIs & Additional Frameworks: REST API design and third-party integrations; additional familiarity with SOAP APIs, GraphQL, and Python web frameworks (Django, FastAPI, Flask).

Databases & Performance: MySQL and PostgreSQL (relational databases); Redis (NoSQL); schema design, SQL query optimization, indexing, caching, and performance troubleshooting.

DevOps & Infrastructure: AWS EC2, Docker, Linux server administration, Bash scripting, Nginx/Apache configuration, Supervisor, SSL, and GitHub Actions for CI/CD workflows; foundational knowledge of Kubernetes (K8s).

Real-Time & Payment Systems: WebSockets and Laravel Reverb for location tracking, messaging, and notifications; payment gateway integrations, digital wallets, transaction workflows, refunds, and pricing logic.

Applied AI (Learning & Projects): LLM API integration and AI-powered application features; practical exploration of AI agents, LangChain, LangGraph, and vector database concepts.

Industrial Automation (Training): PLC programming with Ladder Logic; introductory DCS and industrial measurement/instrumentation training.

Engineering Practices: Git/GitHub, Agile/Scrum collaboration, code reviews, technical task planning, debugging, clean code principles, and familiarity with test-driven development (TDD).

PROFESSIONAL TRAINING & CERTIFICATIONS

- **Industrial PLC – Basic and Advanced Applications** | Jelecom | 2015
- **PLC & DCS Training** | Alexandria Petroleum Company | 2015
- **DCS, PLC, Measurements & Instrumentation** | Egyptian Styrene & Polystyrene Production Company | 2014
- **Light Current Systems Training** | Bibliotheca Alexandrina (BIBALEX) | 2013

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering

Arab Academy for Science, Technology & Maritime Transport | 2016
GPA: 3.2/4.0 (Very Good)

Graduation Project: EEG-Based Brain–Computer Interface (BCI) for Robotic Vehicle Control | **Grade: A+**

Analyzed EEG signals across four brainwave frequency bands to identify relevant frequency ranges for controlling a small robotic vehicle using a headset-based interface.

PERSONAL SKILLS

Technical coordination and task delegation | Code review and developer support | Analytical problem solving | Cross-functional communication | Adaptability | Time management | Accountability

LANGUAGES

Arabic – Native | English – Fluent | French – Basic
